Water Management Solutions UK Ltd were appointed to look into InBond's surface water drainage costs for its site on Malleable Way, Stockton on Tees.

Chris took away all of the relevant detail and progressed to look into such claims with the provider. The process was not onerous on InBond and following a period of investigation, InBond were awarded a significant rebate dating back 3 charging periods and ongoing reductions to the site surface water drainage costs.

We would recommend WMS for their professional service and understanding of such claims, with a proven record of delivering significant savings to their clients.
